Protective Packaging Solutions

GEOSPEED™ 100 PAPER PACKAGING SYSTEM

The GeoSpeed 100 paper packaging system is an outstanding choice for those seeking a solution for hard to package items, small voids, sharp or unboxed items. Our patented design produces tightly crumpled paper cushions for void fill, cushioning, wrapping or blocking and bracing purposes.

Fast and easy to operate, GeoSpeed 100 provides exceptionally flexible and eco-friendly packaging material at up to 70 inches per second. Further, the biodegradable, renewable kraft paper is recyclable and reusable.

Features and Benefits:	Results:
Fast	The GeoSpeed system produces up to 70 inches of material per second.
Operator-friendly	Easy to program visual controls and foot pedal make operation a cinch!
Unique loading feature	Patented roller loading system enables safe and easy loading.
Versatile	The GeoSpeed system dispenses custom lengths or continuous on-demand, high beam strength cushioning.
Environmentally responsible	Paper packaging material is recyclable, renewable and biodegradable.
Photo-eye automation	Operators can select a length which is then generated automatically, eliminating the need to constantly press a foot pedal.

THINK SUSTAINABILITY, THINK PREGIS

GeoSpeed 100 is an addition to the Pregis "green" family of products whose purpose is addressing the growing need for sustainable packaging alternatives. Environmentally responsible practices are an important part of Pregis' business philosophy.

CUSTOMIZATION, VERSATILITY, FLEXIBILITY

At speeds of 70 inches per second, users can increase productivity and cost effectiveness. GeoSpeed 100 can generate multiple quantities of small or large rigid, tightly crumpled cushions for a broad array of packaging applications.

IDEAL APPLICATIONS

- Sharp products
- Items needing absorption
- Open stock/open box items
- Small void items
- Items needing temperature insulation
- Fulfillment items

THE PREGIS SYSTEMS OFFERING

Proven, high performance films and cost effective machines make Pregis systems the preferred solution and leading systems offering in the industry today.

AIRSPEED™ 5000 HIGH SPEED VOID FILL SYSTEM

- Fast! Runs at 75' per minute.
- Full functionality, yet quick to load, and easy to operate.
- Multiple sizes and grades of market leading film.
- Wider, true width film saves money.

AIRSPEED™ HC HYBRID CUSHIONING SYSTEM

- Fast! Runs at 75' per minute.
- Excellent film clarity and configuration.
- No material wasted at perforation.
- Adjustable air pressure and multiple film sizes.

AIRSPEED™ SMART™ COMPACT VOID FILL SYSTEM

- Small, flexible footprint.
- Simple start/stop operation.
- Perfect for small or decentralized work stations.
- Reliable with minimal wear items.

AIRSPEED™ 9000 ENGINEERED CUSHIONING

- One-step process reduces labor.
- Saves warehouse space.
- Reduced cubing saves freight.
- Outstanding air retention, puncture resistance and cushioning.
